Recipient's Name
Address

Dear XYZ,

As a student of Computer Science Engineering, I am skilled in languages like java, python, CPP. Moreover, I have made projects in web development which gave me exposure to HTML, CSS, JavaScript, React Js, and Bootstrap. I have realized that I actually like working on web technologies and I look forward to learning more. I am hopeful that you will consider me for an internship of a web developer in your company.

I am confident, a team player, and a quick learner. I have also done an internship as a web developer in ABC company and I have confidence in my skills. I can take responsibilities and my work will speak volumes if I get hired for an internship in your office. My skills and experience would be beneficial in support of already existing projects and to the new projects as well. I look forward to adding value to your company and to my career as well.

Sincerely,
OPQ
