

Motivation Letter for Postdoc

From,

Ayush Jha

Ssn Market, Street 6

Chandigarh

Date: 12 July 2020

To,

QT University

Chandigarh

Dear Sir,

I am writing this letter to express my interest for working as a part-time professor in VLSI design and electrical engineering. I am pursuing my doctorate degree in electrical engineering from ABC University. My doctorate degree is expected to finish this year in December. I am highly interested in electrical engineering research program and I am keen to work as adjunct faculty position at the university. I believe that my research and in-depth knowledge makes me a perfect fit for this role. I have an outstanding academic background and two years of experience in licensed electrical engineer at YZ company which has helped me in developing my skills and gaining experience. I would be pleased for having an opportunity to discuss about the job position. I have attached my CV and other copies of certificates and relevant documents. I look forward to work in the university and share knowledge with students. Thank you for consideration.

Sincerely,

Ayush Jha
